

## Protect Your Family from Radon

Radon is a gas that you can't **see, smell, or taste** — but it can be dangerous. It's the second leading cause of lung cancer in the U.S.

Radon is in the ground naturally. But sometimes it gets into homes through cracks in the floors or walls.

15

homes have high radon levels

## Radon and Smoking: A Dangerous Combination

If you live in a home with high radon levels, smoking raises your risk of lung cancer by **10 times**.

## Take the First Step

**There's good news** — you can protect your family by testing your home for radon.
